

CALL FOR PAPERS

**Estonian Research Institute of Agriculture is organizing
an international conference:**

„Food/Feed Quality, Safety and Risks in Agriculture“

**October 25-28, 2011
in Tallinn, Estonia**

Aim of the Conference

The Conference is organized under the umbrella of the EU FP7 REGPOT project FLAVOURE („Food and feed Laboratory of Varied and OUTstanding Research in Estonia) to celebrate the successful implementation of the project activities. This conference aims to demonstrate the role of research in developing new technologies which able to ensure food/feed quality as well as to identify and reduce the risk factors in production chain.

With this conference we wish to bring together researchers working with different aspects of food and feed quality and safety, as well as industry representatives and other stakeholders of agricultural and food sector to share their experiences and ideas and to explain the possibilities for making efficient use of research results from the commercial point of view and for enabling a sustainable use of resources.

Topics

The Conference will focus on the following main areas:

Technological aspects of food quality;

- In this session presentations are expected to cover the technologies that influence the quality of foods of plant and animal origin as well as food processing technology, including packaging and producing.

Technological aspects of feed quality;

- In this section presentations are expected to focus on the technological aspects that influence the quality of feeds used for production animals, or to reflect on the connections between feed quality, animal health and their impact on the end product.

Risks related to food quality and safety in production chain.

- The expected presentations concentrate on the potential risk factors in all parts of the food production chain from field and production animal to end consumers.

Language

Conference will be held in English.

Application for participation

There will be no participation fee for attending of scientific events.

Registration form is available at <http://www.flavoure-project.eu//projects/flavoure/events/flavoure-conference/registration-information>

Publishing:

All scientific papers that are received in time and are accepted by reviewers will be published in a special issue of the journal Agronomy Research.

Research papers will be indexed CABI Full Paper and Thompson Scientific database: Zoological Record, Biological Abstracts and Biosis Previews, AGRIS, ISPI, CAB Abstracts, AGRICOLA, VINITI, INIST-PASCAL.

Instructions for authors:

- The articles should be prepared in English and sent by May 30, 2011 via e-mail to flavoure@eria.ee;
- Length of the manuscript should be 4 or 6 pages;
- Papers are considered by referees before acceptance;
- The manuscript should strictly followed the instructions provided here <http://www.flavoure-project.eu//projects/flavoure/events/flavoure-conference/instructions-to-authors>

Deadlines

- **30 May 2011**, deadline for submission of manuscripts (sent via e-mail)
- **30 May 2011**, deadline for preregistration
- **25-28 October 2011**, Conference
