

APPENDIX IV – RESULTS OF THE EU CO-ORDINATED PROGRAMME

Procymidone	14	13	1															0,010			0,02	EC MRL	
Profenofos	14	14																			0,05	EC MRL	
Propargite	14	14																					
Pyrethrins																					1,00	EC MRL	
Pyrimethanil	14	14																					
Pyriproxyfen	14	14																					
Quinoxifen	14	14																			0,02	EC MRL	
Spiroxamine	14	14																			0,05	EC MRL	
Tebuconazole	14	14																					
Tebufenozide	14	12				1		1													0,120		
Thiabendazole	14	13								1											0,620	5,00	EC MRL
Thiodicarb (see Methomyl)																							
Thiophanate-methyl	14	14																				0,50	EC MRL
Tolclofos-methyl	14	14																					
Tolyfluanid (Sum of Tolyfluanid and Dimethylaminosulfotoluidide, expressed as Tolyfluanid)	14	13				1															0,043		
Triadimefon (sum of Triadimefon and Triadimenol)	14	14																				0,20	EC MRL
Triadimenol (see Triadimefon)																							
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	14	14																				1,00	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Brassica Vegetables

Food item: Head Cabbage

Note, if any:

Reporting country:

Austria

Year of sampling: 2007

Total number of samples analysed:

15

With residues above MRL (EC+national):

0

Without detectable residues:

14

With residues above EC-MRL:

0

With detectable residues at or below MRL or without MRL:

Buprofezin		15	15																		
Captan (1)		15	15																0,10	EC MRL	
Carbaryl		15	15																0,05	EC MRL	
Carbendazim (see Benomyl)																					
Chloromequat																					
Chlorothalonil		15	15																3,00	EC MRL	
Chlorpropham (Chlorpropham and 3-chloroaniline, expressed as Chlorpropham)		15	15																0,05	EC MRL	
Chlorpyrifos		15	15																1,00	EC MRL	
Chlorpyrifos-methyl		15	15																0,05	EC MRL	
Cypermethrin (Cypermethrin including other mixtures of constituent isomers (sum of isomers))		15	15																0,50	EC MRL	
Cyprodinil		15	15																		
Deltamethrin (cis-deltamethrin)		15	15																0,10	EC MRL	
Diazinon		15	15																0,02	EC MRL	
Dichlofuanid		15	15																5,00	EC MRL	
Dichlorvos		15	15																0,10	EC MRL	
Dicofol (sum of p, p' and o,p' isomers)		15	15																0,02	EC MRL	
Dimethoate (sum of Dimethoate and Omethoate, expressed as Dimethoate)		15	15																1,00	EC MRL	
Diphenylamine		15	15																0,05	EC MRL	
Dithiocarbamates (expressed as CS) (2)		8	8																1,00	EC MRL	
Endosulfan (sum of alpha- and beta-isomers and Endosulfan-sulphate, expressed as Endosulfan)		15	15																0,05	EC MRL	
Fenhexamid		15	15																0,05	EC MRL	
Fenitrothion		15	15																0,01	EC MRL	
Fludioxonil		15	15																		
Folpet (1)		15	15																0,10	EC MRL	
Hexythiazox		15	15																		
Imazalil		15	15																0,02	EC MRL	
Imidacloprid		15	15																		
Indoxacarb (sum of the isomers S and R)		15	14				1										0,010				
Iprodione		15	15																5,00	EC MRL	
Iprovalicarb		15	15																0,05	EC MRL	
Kresoxim-methyl		15	15																0,05	EC MRL	
Lambda-Cyhalothrin		15	15																0,20	EC MRL	
Malathion (sum of Malathion and Malaoxon, expressed as Malathion)		15	15																3,00	EC MRL	
Mepanipyrim (Mepanipyrim and its metabolite (2-anilino-4-(2-hydroxypropyl)-6-methylpyrimidine) expressed as Mepanipyrim)		15	15																		
Metalaxyl (metalaxyl including other mixtures of constituent isomers including Metalaxyl-M (sum of isomers))		15	15																0,05	EC MRL	
Methamidophos		15	15																0,50	EC MRL	
Methidathion		15	15																0,02	EC MRL	
Methiocarb (aka Mercaptodimethur)		15	15																		
Methomyl (sum of Methomyl and Thiodicarb, expressed as Methomyl)		15	15																0,05	EC MRL	
Myclobutanil		15	15																0,02	EC MRL	
Omethoate (see Dimethoate)																					
Oxamyl		15	15																0,01	EC MRL	
Oxydemeton-methyl (sum of Oxydemeton-methyl and Demeton-S-methylsulfone, expressed as Oxydemeton-methyl)		15	15																0,05	EC MRL	
Parathion		15	15																0,05	EC MRL	
Panconazole		15	15																0,05	EC MRL	
Phosalone		15	15																1,00	EC MRL	
Pirimicarb (sum of Pirimicarb and Desmethyl pirimicarb, expressed as Pirimicarb)		15	15																		
Pirimiphos-methyl		15	15																0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0,02" includes the range from 0,011 mg/kg up to 0,020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS₂, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS₂ can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Stem Vegetables

Food item: Leek

Note, if any:

Reporting country:

Czech Republic

Year of sampling: 2007

Total number of samples analysed:

12

With residues above MRL (EC+national):

0

Without detectable residues:

9

With residues above EC-MRL:

0

With detectable residues at or below MRL or without MRL:

3

With residues above national MRL:

0

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Triadimefon (sum of Triadimefon and Triadimenol)	13	13	0,200	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0,200	0,20	EC MRL
Triadimenol (see Triadimefon)	0																			
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	13	13	0,010	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0,010	0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	15	15	0,010	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0,010	5,00	EC MRL

(*) i.e column "0,02" includes the range from 0,011 mg/kg up to 0,020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Leafy Vegetables

Food item: Lettuce

Note, if any:

Reporting country:

Germany

Year of sampling: 2007

Total number of samples analysed:

814

With residues above MRL (EC+national):

19

Without detectable residues:

304

With residues above EC-MRL:

17

With detectable residues at or below MRL or without MRL:

491

With residues above national MRL:

2

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Cereals

Food item: Rye

Note, if any:

Reporting country:

Germany

Year of sampling: 2007

Total number of samples analysed:

105

With residues above MRL (EC+national):

0

Without detectable residues:

76

With residues above EC-MRL:

0

With detectable residues at or below MRL or without MRL:

29

With residues above national MRL:

0

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Cereal

Food item: Oats

Note, if any:

Reporting country:

Germany

Year of sampling: 2007

Total number of samples analysed:

0

With residues above MRL (EC+national):

0

Without detectable residues:

(*) i.e column "0,02" includes the range from 0,011 mg/kg up to 0,020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as C_S, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as C_{S2} can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Triadimenol (see Triadimefon)	0																				
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	16	16	0,020																	0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Mepanipyrim (Mepanipyrim and its metabolite (2-anilino-4-(2-hydroxypropyl)-6-methylpyrimidine.) expressed as Mepanipyrim)		9	9	0.010															0.01	EC MRL	
Metalaxyl (Metalaxyl including other mixtures of constituent isomers including Metalaxyl-M (sum of isomers))		9	9	0.020															0.05	EC MRL	
Methamidophos		9	9	0.010															0.01	EC MRL	
Methidathion		9	9	0.020															0.02	EC MRL	
Methiocarb (aka Mercaptodimethur)		9	9	0.050																	
Methomyl (sum of Methomyl and Thiodicarb, expressed as Methomyl)		9	9	0.030															0.05	EC MRL	
Myclobutanil		9	9	0.020															0.02	EC MRL	
Omethoate (see Dimethoate)		0																			
Oxamyl		9	9	0.020															0.01	EC MRL	
Oxydemeton-methyl (sum of Oxydemeton-methyl and Demeton-S-methylsulfone, expressed as Oxydemeton-methyl)		9	9	0.030															0.10	EC MRL	
Parathion		9	9	0.020															0.05	EC MRL	
Penconazole		9	9	0.020															0.05	EC MRL	
Phosalone		9	9	0.030																	
Pirimicarb (sum of Pirimicarb and Desmethyl pirimicarb, expressed as Pirimicarb)		9	9	0.020																	
Pirimiphos-methyl		9	9	0.020															5.00	EC MRL	

Prochloraz (sum of Prochloraz and its metabolites containing the 2,4,6-trichlorophenol moiety, expressed as Prochloraz)	9	9	0,020																			1,00	EC MRL		
Procymidone	9	9	0,020																				0,02	EC MRL	
Profenofos	9	9	0,030																				0,05	EC MRL	
Propargite	9	9	0,020																						
Pyrethrins	0																							3,00	EC MRL
Pyrimethanil	9	9	0,030																						
Pyriproxyfen	9	9	0,020																						
Quinoxifen	0																							0,20	EC MRL
Spiroxamine	9	9	0,020																					0,30	EC MRL
Tebuconazole	9	9	0,010																						
Tebufenozide	9	9	0,010																						
Thiabendazole	9	9	0,010																					0,05	EC MRL
Thiodicarb (see Methomyl)	0																								
Thiophanate-methyl	0																							0,30	EC MRL
Tolclofos-methyl	9	9	0,020																						
Tolyfluanid (Sum of Tolyfluanid and Dimethylaminosulfotoluidide, expressed as Tolyfluanid)	9	9	0,020																						
Triadimefon (sum of Triadimefon and Triadimenol)	9	9	0,020																					0,20	EC MRL
Triadimenol (see Triadimefon)	0																								
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	9	9	0,010																					0,05	EC MRL

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS₂ including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS₂ can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Berries and small fruits

Food item: Strawberries

Note, if any: Fenhexamid and methiocarb: non-authorized use in Estonia

Reporting country:

Estonia

Year of sampling: 2007

Total number of samples analysed:

22

With residues above MRL (EC-national):

1

Without detectable residues:

8

With residues above EC-MRL:

1

With detectable residues at or below MRL or without MRL:

13

With residues above national MRL:

Toclofos-methyl	18	18	0,020																		
Tolyfluanid (Sum of Tolyfluanid and Dimethylaminosulfotoluidide, expressed as Tolyfluanid)	18	18	0,010																		
Triadimefon (sum of Triadimefon and Triadimenol)	18	18	0,010																	0,10	EC MRL
Triadimenol (see Triadimefon)	18	18	0,010																		
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	18	18	0,010																	0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Triadimenol (see Triadimefon)				0																			
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)				61	61	0,010																0,05	EC MRL

(*) i.e column "0,02" includes the range from 0,011 mg/kg up to 0,020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneab, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e. column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Triadimefon (sum of Triadimefon and Triadimenol)	12	12	0.02																0,10	EC MRL
Triadimenol (see Triadimefon)	0																			
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	12	12	0.01																0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Thiabendazole	31	31																		0,05	EC MRL
Thiodicarb (see Methomyt)																					
Thiophanate-methyl	31	31																		0,30	EC MRL
Tolclofos-methyl	31	31																			
Tolyfluanid (Sum of Tolyfluanid and Dimethylaminosulfotoluidide, expressed as Tolyfluanid)	31	31																			
Triadimefon (sum of Triadimefon and Triadimenol)	31	31																		0,20	EC MRL
Triadimenol (see Triadimefon)	0	0																			
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	31	31																		0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS₂ including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS₂ can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Cereal

Food item: Oats

Note, if any:

Reporting country:

Italy

Year of sampling: 2007

Total number of samples analysed:

4

With residues above MRL (EC+national):

0

Without detectable residues:

4

With residues above EC-MRL:

0

With detectable residues at or below MRL or without MRL:

0

With residues above national MRL:

0

(*) i.e. column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS₂, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS₂ can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Tolclofos-methyl	13	13	0,010																	
Tolyfluanid (Sum of Tolyfluanid and Dimethylaminosulfotoluidide, expressed as Tolyfluanid)	13	13	0,050																	
Triadimefon (sum of Triadimefon and Triadimenol)	13	13	0,050																0,10	EC MRL
Triadimenol (see Triadimefon)	0																			
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	13	13	0,020																0,05	EC MRL

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Tolyfluanid (Sum of Tolyfluanid and dimethylaminosulfotoluidide, expressed as Tolyfluanid)	12	12	0,050																				
Triadimefon (sum of Triadimefon and Triadimenol)	12	11	0,050																0,160	0	0,10	EC MRL	
Triadimenol (see Triadimefon)	0																						
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	12	12	0,020																			0,05	EC MRL

(*) i.e. column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Triadimenol (see Triadimefon)	0																							
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	15	15	0,020																				5,00	EC MRL

(*) i.e column "0,02" includes the range from 0,011 mg/kg up to 0,020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Triadimefon (sum of Triadimefon and Triadimenol)	11	11	0,050																	0,10	EC MRL
Triadimenol (see Triadimefon)	0																				
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	11	11	0,050																	0,05	EC MRL

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Thiodicarb (see Methomyl)	0																				
Thiophanate-methyl	0																			2,00	EC MRL
Tolclofos-methyl	12	12	0,050																		
Tolyfluanid (Sum of Tolyfluanid and dimethylaminosulfotoluidide, expressed as Tolyfluanid)	12	12	0,050																		
Triadimefon (sum of Triadimefon and Triadimenol)	12	12	0,050																	0,10	EC MRL
Triadimenol (see Triadimefon)	0																				
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	12	12	0,050																	0,05	EC MRL

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Triadimenol (see Triadimefon)			0																								
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)			11	11	0,050																				5,00	EC MRL	

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Tebufenozide	14	14																			
Thiabendazole	14	14																		0,05	EC MRL
Thiodicarb (see Methomyl)	0	0																			
Thiophanate-methyl	5	5																		0,10	EC MRL
Tolclofos-methyl	5	5																			
Tolyfluanid (Sum of Tolyfluanid and Dimethylaminosulfotoluidide, expressed as Tolyfluanid)	12	12																			
Triadimefon (sum of Triadimefon and Triadimenol)	14	14																		0,10	EC MRL
Triadimenol (see Triadimefon)	0	0																			
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	14	14																		0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Triadimenol (see Triadimefon)	0																																	
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	0																																0,05	EC MRL

(*). i.e. column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS₂ including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS₂ can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Tebuconazole	15	15																		
Tebufenozide	15	15																		
Thiabendazole	15	15																	0,05	EC MRL
Thiodicarb (see Methomyl)																				
Thiophanate-methyl	15	15																	0,10	EC MRL
Tolclofos-methyl	15	15																		
Tolyfluanid (Sum of Tolyfluanid and dimethylaminosulfotoluidide, expressed as Tolyfluanid)	15	15																		
Triadimefon (sum of Triadimefon and Triadimenol)	15	15																	0,10	EC MRL
Triadimenol (see Triadimefon)																				
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	15	15																	0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Tolyfluanid (Sum of Tolyfluanid and dimethylaminosulfotoluidide, expressed as Tolyfluanid)	15	15																				
Triadimefon (sum of Triadimefon and Triadimenol)	15	15																			0,30	EC MRL
Triadimenol (see Triadimefon)																						
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	15	15																			0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as C₅, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Tolclofos-methyl	69	69	0,025																
Tolyfluanid (Sum of Tolyfluanid and Dimethylaminosulfotoluidide, expressed as Tolyfluanid)	69	68	0,010			1							0,032					3,00	N
Triadimefon (sum of Triadimefon and Triadimenol)	69	69	0,010															0,10	EC MRL
Triadimenol (see Triadimefon)	0																		
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	69	69	0,050															0,05	EC MRL

(*) i.e. column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Triadimenol (see Triadimefon)	128	128																			
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	128	128	0,050																	0,05	EC MRL

(*) i.e. column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS₂, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS₂ can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Tebufenozide	1	1	0,002																	
Thiabendazole	1	1	0,002																0,05	EC MRL
Thiodicarb (see Methomyl)	0																			
Thiophanate-methyl	1	1																	0,30	EC MRL
Tolclofos-methyl	1	1	0,002																	
Tolyfluanid (Sum of Tolyfluanid and Dimethylaminosulfotoluidide, expressed as Tolyfluanid)	1	1	0,002																	
Triadimefon (sum of Triadimefon and Triadimenol)	1	1	0,002																0,20	EC MRL
Triadimenol (see Triadimefon)	0																			
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	1	1	0,005																0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS₂ including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS₂ can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)			22	22	0,010																	0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Tebufoenozide	7	7	0,010																		
Thiabendazole	8	8	0,010																	0,05	EC MRL
Thiodicarb (see Methomyf)	0																				
Thiophanate-methyl	8	8	0,100																	0,30	EC MRL
Tolclofos-methyl	9	9	0,010																		
Tolyfluaniid (Sum of Tolyfluaniid and Dimethylaminosulfotoluidide, expressed as Tolyfluaniid)	9	9	0,020																		
Triadimefon (sum of Triadimefon and Triadimenol)	9	9	0,010																	0,20	EC MRL
Triadimenol (see Triadimefon)	0																				
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	9	9	0,020																	0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS₂ including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS₂ can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Fruiting Vegetables

Food item: Tomatoes

Note, if any:

Reporting country:

Poland

Year of sampling: 2007

Total number of samples analysed:

50

With residues above MRL (EC-national):

0

Without detectable residues:

39

With residues above EC-MRL:

0

With detectable residues at or below MRL or without MRL:

11

With residues above national MRL:

0

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e. column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0,02" includes the range from 0,011 mg/kg up to 0,020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0,02" includes the range from 0,011 mg/kg up to 0,020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS₂, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS₂ can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Thiophanate-methyl	17	17	0,010																0,10	EC MRL
Tolclofos-methyl	17	17	0,010																	W
Tolyfluanid (Sum of Tolyfluanid and dimethylaminosulfotoluidide, expressed as Tolyfluanid)	17	17	0,010																3,00	N
Triadimefon (sum of Triadimefon and Triadimenol)	17	17	0,010																0,10	EC MRL
Triadimenol (see Triadimefon)	0																			W
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	17	17	0,050																0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e. column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)		30	24	0,050						3	1	1	1											0,229	5,00	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Tolyfluanid (Sum of Tolyfluanid and Dimethylaminosulfotoluidide, expressed as Tolyfluanid)	24	24	0,01-0,02	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0		
Triadimefon (sum of Triadimefon and Triadimenol)	24	24	0,01-0,04	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0,10	EC MRL
Triadimenol (see Triadimefon)																						
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	24	24	<0,02	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0,05	EC MRL

(*) i.e column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Leafy Vegetables

Food item: Lettuce

Note, if any:

Reporting country:

Slovenia

Year of sampling: 2007

Total number of samples analysed:

78

With residues above MRL (EC+national):

2

Without detectable residues:

50

With residues above EC-MRL:

2

With detectable residues at or below MRL or without MRL:

26

With residues above national MRL:

0

(*) i.e column "0,02" includes the range from 0,011 mg/kg up to 0,020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Fruiting Vegetables

Food item: Tomatoes

Note, if any:

Triadimenol (see Triadimefon)																						
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	82	82	<0.02	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0,000		0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Cereals

Food item: Rye

Note, if any:

Reporting country:

Slovenia

Year of sampling: 2007

Total number of samples analysed:

14

With residues above MRL (EC+national):

0

Without detectable residues:

11

With residues above EC-MRL:

0

With detectable residues at or below MRL or without MRL:

3

With residues above national MRL:

0

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Triadimenol (see Triadimefon)	0																							
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	13	13	0,020																				0,05	EC MRL

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Tebuconazole	6	6	0,010																	
Tebufenozide	6	6	0,005																	
Thiabendazole	6	6	0,010																0,05	EC MRL
Thiodicarb (see Methomyl)	0																			
Thiophanate-methyl	6	6	0,010																0,30	EC MRL
Tolclofos-methyl	6	6	0,010																	
Tolyfluanid (Sum of Tolyfluanid and Dimethylaminosulfotoluidide, expressed as Tolyfluanid)	6	6	0,020																	
Triadimefon (sum of Triadimefon and Triadimenol)	6	6	0,020																0,20	EC MRL
Triadimenol (see Triadimefon)	0																			
Vinclozolin (sum of Vinclozolin and all metabolites containing the 3,5-dichloraniline moiety, expressed as Vinclozolin)	6	6	0,020																0,05	EC MRL

(*) i.e. column "0,02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS₂ including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS₂ can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Berries and small fruits

Food item: Strawberries

Note, if any:

Reporting country:

Slovakia

Year of sampling: 2007

Total number of samples analysed:

14

With residues above MRL (EC-national):

7

Without detectable residues:

4

With residues above EC-MRL:

0

With detectable residues at or below MRL or without MRL:

3

With residues above national MRL:

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Stone Fruits	Food item: Peaches (including nectarines and symlar hybrids)		Note, if any:
Reporting country:	United Kingdom	Year of sampling:	2007
Total number of samples analysed:	132	With residues above MRL (EC+national):	2
Without detectable residues:	29	With residues above EC-MRL:	2
With detectable residues at or below MRL or without MRL:	101	With residues above national MRL:	0

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B as EU MRL provisions (new residue definition) become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Cereals

Food item: Rye

Note, if any:

Reporting country:

United Kingdom

Year of sampling: 2007

Total number of samples analysed:

3

With residues above MRL (EC+national):

0

Without detectable residues:

3

With residues above EC-MRL:

0

With detectable residues at or below MRL or without MRL:

0

With residues above national MRL:

0

(*) i.e column "0.02" includes the range from 0.011 mg/kg up to 0.020 mg/kg

(**) Please use the following abbreviations for the Source of MRLs: E = EC MRL, N = National MRL, W = Without MRL

(1) Depending on the sampling date, the residue definition considered at MS level might be different from the one proposed in column B (parent compound) as EU MRL provisions become applicable at MS level in May 2007. Please indicate the definition the residue refers to.

(2) Dithiocarbamates, expressed as CS, including maneb, mancozeb, metiram, propineb, thiram and ziram. The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

Notifications of the results of EU co-ordinated programme

Product group: Cereal

Food item: Oats

Note, if any:

Reporting country:

United Kingdom

Year of sampling: 2007

Total number of samples analysed:

71

With residues above MRL (EC+national):

4

Without detectable residues:

58

With residues above EC-MRL:

4

With detectable residues at or below MRL or without MRL:

9

With residues above national MRL:

0
